EXPERIENCE

Infynow Software Solutions LLP (April 2022 – June 2022)

- Choosing the right technologies and frameworks for our web project. We evaluate various options based on factors like project requirements, scalability, and team expertise.
- Design and Experience, Development, and Coding, which I learned.

Intern In Creintors Automation Pvt ltd (April 2024 – June 2024)

- Here I learned to make the software requirements specifications (SRS).
- Group discussion, team management, project management.

ACADEMIC PROJECTS

Employee Management

- A central database to store and manage employee information, including personal details. Taking leave for holidays or sick leaves, and a payroll system to manage employee salaries, bonuses, and benefits.

API interface for information flow of material via logistic partners

- Created an API for handling the warehouse, fetching the products, using QR code generation to tell the location, and making shipments and invoices.

QuizApp Interactive Web-Based Quiz Application

- Developed a quiz app using React, Express.js, Node.js, and MongoDB, featuring real-time scoring, dynamic question generation, and user result tracking. Implemented APIs and a responsive UI for seamless user interaction.
